Adobe® Fireworks® CS5

Rapidly prototype and design for the web
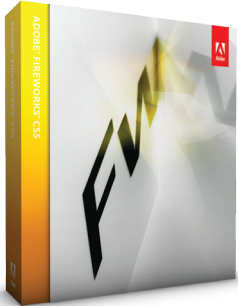

Produce graphics for multiple-screen resolutions faster. Performance-enhanced Adobe Fireworks CS5 software renders with pixel-precise sharpness. Share color swatches with Adobe Photoshop® and Adobe Illustrator® software. Prototype rich media applications for Adobe Flash® Catalyst™ software.

Top reasons to upgrade to Adobe Fireworks CS5

NEW **Extensive performance enhancements**—Improve efficiency with faster performance, an updated graphic toolset, and greater control over pixel placement. An enhanced workflow for design and prototyping provides smooth and consistent operation.

NEW **Pixel-perfect precision**—Keep designs crisp on a wide variety of screen resolutions with pixel-perfect precision. Improved definition means objects in vector and bitmap modes appear sharper, even when converted from one mode to the other.

NEW **Supported workflows with rich media applications**—Export objects, pages, or entire documents to the Flash family of software to develop interactivity. The XML-based FXG export format helps ensure that your rich media application creations are precisely converted and ready for interactive implementation.

NEW **Design templates**—Save frequently used designs as templates that can help jump-start future projects. Share templates with other members of your design team to improve consistency and increase productivity.

NEW **Adobe Swatch Exchange support**—Match colors precisely with designs from other Adobe graphics applications via Adobe Swatch Exchange (ASE). Import an ASE file from Photoshop, Illustrator, or Adobe Kuler,® the Adobe color community, to develop compatible designs and jump-start your creativity.

NEW **Extensibility improvements**—Customize scripts for exporting, batch operations, and FXG formats with the expanded extensibility API. Increase productivity and control by specifying client-specific output formats in automated batch processing.

ENHANCED **Workflow refinements**—Enjoy more than 100 refinements that increase the efficiency of the most used features and workflows. Fewer steps are needed to perform frequent tasks, and keyboard shortcuts have been added to common tasks.

Adobe Fireworks CS5 is also available as a component of these Adobe Creative Suite® 5 editions:
• Web Premium
• Design Premium
• Master Collection

System requirements

Windows®

- Intel® Pentium® 4 or AMD Athlon® 64 processor
- Microsoft® Windows XP with Service Pack 2 (Service Pack 3 recommended); Windows Vista® Home Premium, Business, Ultimate, or Enterprise with Service Pack 1; or Windows 7
- 512MB of RAM (1GB recommended)
- 1GB of available hard-disk space for installation; additional free space required during installation (cannot install on removable flash-based storage devices)
- 1280x1024 display with 16-bit video card
- DVD-ROM drive
- Broadband Internet connection required for online services*

Mac OS

- Multicore Intel processor
- Mac OS X v10.5.7 or v10.6
- 512MB of RAM (1GB recommended)
- 1GB of available hard-disk space for installation; additional free space required during installation (cannot install on a volume that uses a case-sensitive file system or on removable flash-based storage devices)
- 1280x1024 display with 16-bit video card
- DVD-ROM drive
- Broadband Internet connection required for online services*
